

China Sanew Cable Co., Ltd.

HO5SJ-K Fiberglass-Braided Heat Resisting Silicone Rubber Insulation Wire

Product Features:

Good chemical resistance. Excellent electrical properties. When burned, silicone rubber leaves a non-conducting ash, which retains excellent qualities so that continued operation is possible to achieve a controlled shutdown. Fungus resistance. Silicone rubber contains no chlorine or other halogens; therefore, the products of combustion are considerably less toxic and corrosive than materials made from chlorinated hydrocarbons.

Recommended applications:

Silicone rubber insulated cables are used whenever high levels of heat resistance are required, in household appliances, heating and lighting equipment, steel works, rolling mills and foundries, glass and ceramic factories.

**TECHNICAL DATA:**

-  **Min. bend radius for installation:** 10x cable diameter
-  **Temperature range:** -60°C to +180°C
-  **Working Voltage:** 300/500V
-  **Test Voltage:** 2000V
-  **Conductor stranding:** Bare copper wire, tin-coated copper wire
-  **Color Code:** White , Black , Red , Yellow , Green , Blue , Brown , Yellow/Green.(Other colors available on request)
-  **Approvals:** According to VDE 0282-3

Add: 2-1-101, Binhefang, Daxing District, Beijing, China

Zip: 102600
